

# Weekly IW Meeting (8/9)

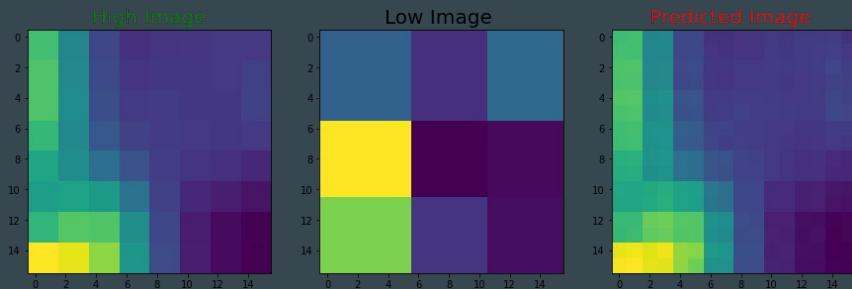

What we did this week

**SRCNN Side**

# Varied Resolution Training Pipeline for Stacking

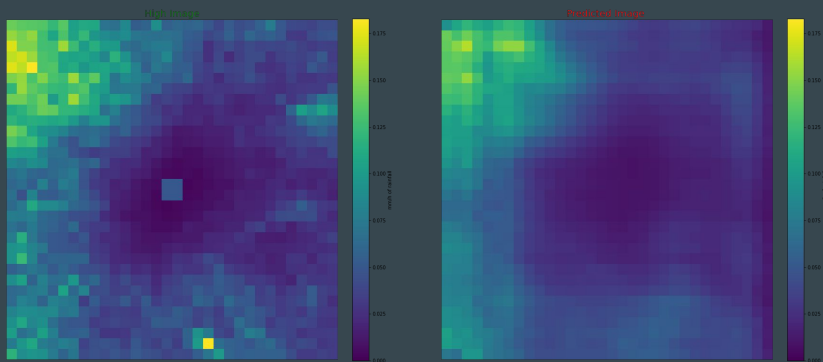

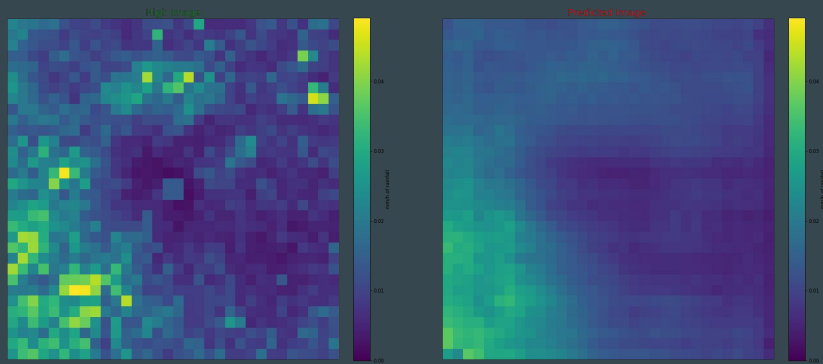

- Implemented variable resolution data pipeline
- Implemented variable resolution model training and validation

- Trained distinct models for different resolution upscaling
- Working on stacking

# Testing out new models:

Observations:

Models consistently displayed high variance

Solutions:

1. Get more data
2. Reduce the size of the models

**GAN Side**
